

# Computer Science Quarterly Project - Quarter 2

Cryshiel G. Yuson, Lorenzo S. Parinas, Aisyah Anela Dumdumaya

Computer Science 3

Alvin F. Fernando

Philippine Science Highschool Caraga Region Campus in Butuan City

## I. The reason why your group chose that Topic

Our group initially wanted to address one major issue in today's world. This caused us to narrow our choices down to poverty, pollution, and corruption. However, what led us to choosing polluting, preferably waste pollution, was because of one of the inspirational speeches from the Campus director of PSHS-CRCBXU, Eng. Ramil A. Sanchez. He stated that keeping a clean environment is an example of wisdom and brilliance. Furthermore, we also had inspiration from our Values Education teacher, Sir Glenn Sionosa. He talked about how a person's true personality can be seen whenever they're mad or eating where he then went to talk about people who eat dirtier than others tend to have a more negative attitude. As a result of both of the influences, our group decided to address the problem of waste pollution and how each and every citizen can contribute to environmental wellness.

## II. Contributions

**Yuson** — Main coder for the entire advocacy website and played a crucial role in choosing the topic, and supported the team as a leader,

**Parinas** — Aided in the nourishment of the design and co-developed page 2.

**Dumdumaya** — Helped develop the links between pages and the link to other platforms, gave the basic concept for pages 3 and 4, and provided supplementary design ideas.
